DevOps Foundations & Development Workflow

Containerization and Kubernetes for DevOps

DevOps Automation, Monitoring & GitOps

Sep 20, 2026

Mustansir mota ghar wala

has successfully completed the online Specialization

Practical DevOps Bootcamp for All

Congratulations on completing the "Practical DevOps Bootcamp for All" specialization! By successfully finishing this specialization, you have gained valuable hands-on experience with modern DevOps practices, cloud infrastructure, and automation tools. You now understand how to manage and deploy applications with Docker, Kubernetes, and AWS. You have learned how to automate CI/CD pipelines and monitor system performance with Prometheus and Grafana. This specialization has equipped you with the technical skills necessary for managing DevOps workflows in real-world environments.

Packt

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
