

FEATURED PROJECT

Burhani | Full-Stack Developer & Founder | [05/26] – Present

[Repository: Burhani Hardware & Machinery](#)

Ongoing Startup Project: A Unified E-commerce & Business Operations Suite

- **Unified Business Ecosystem:** Architecting an all-in-one platform for **small businesses** that merges a high-conversion **B2C** storefront with a robust internal **Business Management System (BMS)** and integrated **delivery** solutions.
- **Zero-Touch Automation:** Engineered a **custom inventory** engine that automates **stock deduction, replenishment, and financial ledger** updates in real-time, bridging the gap between sales and operations.
- **Logistics & Delivery:** Developing an **end-to-end delivery tracking** and management module designed to streamline **local logistics** and order fulfillment for **traditional retail** workflows.
- **Core Integrations:** **Integrated Razorpay API** for secure financial transactions and **Cloudinary** for optimized, **cloud-native** media management to ensure high-speed performance. Hosted on **Render**
- **Mobile-First Optimization:** Designed the entire stack for a **mobile-centric** user base (80%+ traffic), focusing on high-density UI responsiveness and optimized page load speeds.
- **Data-Driven Operations:** Building advanced **financial reporting modules** and automated invoice generation tools to **digitize** and scale **small-scale Traditional Retail operations**.

Job Portal Web Application

[Repository: Job Portal GitHub Repo](#)

Tech Stack: Python, Django, Django REST Framework, SQLite, HTML, CSS, Bootstrap

- Built a **role-based** job portal for **employers** and job **seekers** with separate workflows.
 - Implemented job **posting, saved jobs, profile management**, and application **tracking** features.
 - Developed secure **REST APIs** for jobs, applications, saved jobs, employer job lists, and user profiles using **Django REST Framework**.
 - Applied **role-based** and **owner-based** permissions to protect sensitive operations and resources.
 - Added **resume upload handling, filtering, pagination, validation, and public/private** job visibility rules.
- Improved **Django admin** and wrote automated **tests** for important workflows.

Penguin AIAssistant

[Repository: Penguin AI Assistant Repo](#)

Tech Stack: Python, SpeechRecognition, pyttsx3, Wikipedia, Webbrowser

- Built a **voice-controlled** AI assistant in Python for interactive **command-based** assistance.
- Implemented **speech-to-text** and **text-to-speech** functionality for **voice** interaction.
- Added features such as **website opening, YouTube search, current time/date, Wikipedia search**, and basic conversation handling.
- Designed a **wake-word-based** flow to activate the assistant and process **user commands**.

TECHNICAL SKILLS

- Languages: **Python**, Java, C, C++, SQL, HTML, CSS
- Backend & APIs: **Django**, Django REST Framework, REST API Development
- AI-Assisted Development: OpenAI Codex, Antigravity AI, GitHub Copilot, Prompt Engineering for Developers.
- Libraries: NumPy, **Pandas**, Tkinter, Matplotlib, SpeechRecognition, pyttsx3, Wikipedia
- Tools: Git, GitHub, **GitHub Copilot**, Django Admin
- Concepts: **Authentication & Authorization**, Role-Based Access Control, File Upload Handling, Unit Testing Database: SQLite, MySQL

Education

- | | |
|---|----------------------|
| • Vishwakarma University, Pune | 2025-2027 (Pursuing) |
| Master of Computer Applications(MCA),Pursuing | |
| • IPS Academy, Indore | 2021-2024 |
| Bachelor of Science (B.Sc.)inComputerScience | |

Certifications

- | | |
|--|------|
| • Python using AI, AI for Techies | 2026 |
| • AI Tools and ChatGPT, BE10X | 2026 |
| • Core & Advanced Java TrainingwithProjectWork,SamyakClasses | 2023 |
| • C/C++ Training with ProjectWork,SamyakClasses | 2023 |
